

Washington Department of Fish and Wildlife

Fish Passage & Diversion Screening Inventory Database Report Cover Sheet

The following report is extracted from the Washington Department of Fish and Wildlife's (WDFW) Fish Passage and Diversion Screening Inventory Database (FPDSI). WDFW makes every attempt to keep these reports in sync with FPDSI; however, the dynamic nature of the data and workflows associated with maintaining the database may result in short-term differences.

Users are encouraged to contact WDFW to discuss appropriate use of the data and how we can assist with fish passage barrier removal or inventory. Please visit the Fish Passage web site for contact information at: <https://wdfw.wa.gov/species-habitats/habitat-recovery/fish-passage/about>

Disclaimers:

- Data presented here represent a snapshot observation of conditions in a dynamic environment that is subject to change. Fish passage data are also collected from a variety of agencies and sources. Therefore, WDFW makes no guarantee concerning the data's content, accuracy, completeness, or the results obtained from use of the data. WDFW assumes no liability for the data represented here.
- These data are not an attempt to provide you with an official agency response as to the impacts of your project on fish and wildlife.
- Note that some fish passage features, habitats or species may occur in areas not currently known to the WDFW Fish Passage division, and may not be reflected in this database. A lack of data does not necessarily indicate that a feature, habitat, or species are not present.
- Unauthorized attempts to alter or modify these data are strictly prohibited.
- Bankfull width measurements included in these reports should not be used for fish passage crossing design. They are solely for assessment purposes.
- The barrier status reported in this document is based on the swimming abilities of adult salmonids. Passabilities are a qualitative value, and should not be interpreted as a quantitative calculation. Please see page 1-4 of the Fish Passage Inventory, Assessment and Prioritization Manual for further clarification: <https://wdfw.wa.gov/publications/02061>
- EXIF data presented with Image Reports may be erroneous due to camera battery failures and resetting of camera clock functions.

Abbreviations:

Most abbreviations in this report are defined in the Quick Reference Tables of the Fish Passage Inventory, Assessment, and Prioritization Manual. Additional commonly used abbreviations are defined as follows:

NFB = no potential salmonid use, **BB** = both banks, **LB** = left bank looking downstream, **RB** = right bank looking downstream, **US** or **U/S** = upstream, **DS** or **D/S** = downstream, **WSDrop** = water surface drop, **BFW** = bankfull width, **OHW** = ordinary high water, **SLW** = scour line width, **CMP** = corrugated metal pipe, **Q_{fp}** = fish passage flow, **V&D** = Velocity and Depth, **ROW** = Right of Way

The FPDSI database often uses default values such as '-99.99' or '-999' to represent null values.

Level A Culvert Assessment Report

Site ID:	991242		
Latitude:	47.819009063	Stream:	unnamed
Longitude:	-122.642708424	Tributary To:	Kinman Cr
		WRIA:	15
		Fish Use Potential:	Yes

Data Source:	Washington Department of Fish and Wildlife		
Field Crew:	Nettnin;Whitney	Review Date:	8/10/2004

Culvert Details								Level A Parameters					
ID	Shape	Material	Span	Rise	Length	WDIC	Apron	WSDrop	Location	Countersunk	Backwater	Slope (%)	Sediment
1.1	RND	PCC	0.76	0.76	27.30	0.12	NO	0.00		No		2.64	
All dimensions in meters													

Channel Description	
Toe Width (m):	1
Average Width (m):	2.00
Culvert/Stream Width Ratio:	0.38
Plunge Pool	
Length (m):	0.00
Max Depth (m):	-99.99
OHW Width (m):	-999.99
Road	
Fill Depth (m):	4.00

Assessment Results		Tidal Influence:		Tidegate Present:	No
Barrier:	Yes	Passability (%):	0	Method:	Level A
Reason:	Slope	Fishway Present:	No	Recheck:	

Comments
No plunge pool. Interior grade brake. Water appears level untill upper 3-4 tile then slope increases sharply.

Potential Habitat Gain					
Survey Type:	RSFS	Spawning (sq m):	871	Length (m):	1,730
Significant Reach:	Yes	Rearing (sq m):	4,012	PI Total	14.71

Habitat Survey Summary Report

Site ID: **991242**

Latitude: **47.819009063** Longitude: **-122.642708424** WRIA: **15**

Stream: **unnamed** Tributary To: **Kinman Cr** PI Total: **14.71**

Survey Type

Spreadsheet File(s):

991242.XLS

Downstream Survey

Date: Crew: Length (m):

Downstream Comments:

DC by G. Johnson & Caudill. 170 m to confluence with Kinman Cr, anadromous access verified.

Upstream Survey

Date: Crew: Length (m):

Upstream Comments:

3% gradient US for 80 m, then 0% for 50 m, then 5% for next 70 m. Spawning fair, good rearing, high cover, high spring influence, some LWD, juveniles observed DS & US (8/4/11 notes).

Potential Habitat Gain

Lineal (m):

Spawning Area (sq m):

Rearing Area (sq m):

Distribution

- ☒ Anadromous
☐ Resident Only
☐ Unknown

Gain Direction (Resident Only):

Potential Species Benefit

☐ Sockeye / Kokanee

☐ Chinook

☒ Searun Cutthroat

☐ Pink

☒ Coho

☒ Resident Trout

☐ Chum

☒ Steelhead

☐ Bull Trout

WDFW Fish Passage and Diversion Screening Inventory Database

Barrier Priority Index Report

Site ID: 991242

Stream	unnamed	Trib To	Kinman Cr	WRIA	15
Habitat (H) Estimation Method			RSFS		

	B	H	M	D	C	Species PI
Sockeye			2		1	0.00
Pink			2		1	0.00
Chum			2		1	0.00
Coho	1	3,548	2	2	1	5.16
Chinook			2		1	0.00
Steelhead	1	3,548	2	1	1	1.96
Searun Cutthroat	1	3,548	2	1	1	4.03
Resident Trout	1	4,012	1	1	1	3.56
Dolly/Bull Trout					1	0.00
	TOTAL PI					14.71

B = proportion of fish passage improvement (1, 0.67, 0.33).

H = potential habitat gain (square meters), spawning habitat for sockeye, pink and chum, rearing habitat for the rest.

M= mobility modifier (anadromous = 2, resident = 1).

D = stock condition modifier (critical = 3, depressed = 2, not 2 or 3 = 1).

C= repair cost modifier (<\$100K = 3, \$100K - \$500K = 2, >\$500K = 1).
